What the project focuses on.

Connect customer feedback to the correct deliverable version and milestone decision.

FEATURE 01

Milestone timeline

Make project stages and decisions easier to follow.

FEATURE 02

Versioned deliverables

Keep feedback attached to the correct file version.

FEATURE 03

Customer feedback threads

Bring customer comments into the project context.

FEATURE 04

Approval decision history

Retain a clear record of approval decisions.

Workflow at a glance

STEP 01

Review a milestone

STEP 02

Open the latest deliverable

STEP 03

Provide feedback

STEP 04

Record approval

This overview communicates the project's intended business flow; it is not a technical specification or original system diagram.

The business objectives.

The project's focus translated into practical goals for the people using it.

OBJECTIVE 01

Customers could identify the latest shared deliverable.

OBJECTIVE 02

Teams could link feedback to a specific version.

OBJECTIVE 03

Outstanding decisions could remain visible across time zones.

Design considerations

- Make the primary customer task clear on mobile and desktop.
- Keep permissions, validation, and administrative review explicit.
- Provide clear status, feedback, and recovery for incomplete actions.

About this brief

Prepared from the current portfolio summary. Client identities, original screenshots, delivery dates, and measured results were not supplied. The artwork is AI-generated; business benefits describe objectives, not verified outcomes.
