What the project focuses on.

Clarify administrative booking choices and availability without presenting medical guidance.

FEATURE 01

Location and service selection

Start booking with the appropriate place and service.

FEATURE 02

Slot availability checks

Make available appointment choices understandable.

FEATURE 03

Booking changes and reminders

Clarify changes and reminders around a booking.

FEATURE 04

Staff scheduling view

Give staff an administrative scheduling overview.

Workflow at a glance

STEP 01

Choose location and service

STEP 02

Check available times

STEP 03

Confirm or change booking

STEP 04

Send a reminder

This overview communicates the project's intended business flow; it is not a technical specification or original system diagram.

The business objectives.

The project's focus translated into practical goals for the people using it.

OBJECTIVE 01

Visitors could find available appointment options themselves.

OBJECTIVE 02

Staff could inspect booking changes without separate calendar copies.

OBJECTIVE 03

Administrative reminders could use the confirmed appointment details.

Design considerations

- Make the primary customer task clear on mobile and desktop.
- Keep permissions, validation, and administrative review explicit.
- Provide clear status, feedback, and recovery for incomplete actions.

About this brief

Prepared from the current portfolio summary. Client identities, original screenshots, delivery dates, and measured results were not supplied. The artwork is AI-generated; business benefits describe objectives, not verified outcomes.
