What the project focuses on.

Keep extracted shipment information connected to the source document and reviewer corrections.

FEATURE 01

Shipment-linked document library

Organize paperwork around its shipment context.

FEATURE 02

Source-linked field extraction

Keep an extracted field connected to its source.

FEATURE 03

Missing-document checklist

Make incomplete shipment documentation visible.

FEATURE 04

Reviewer correction history

Retain the context of reviewer corrections.

Workflow at a glance

STEP 01

Organize shipment files

STEP 02

Extract source-linked fields

STEP 03

Review missing documents

STEP 04

Record corrections

This overview communicates the project's intended business flow; it is not a technical specification or original system diagram.

The business objectives.

The project's focus translated into practical goals for the people using it.

OBJECTIVE 01

Teams could search by shipment instead of attachment name.

OBJECTIVE 02

Missing information could be flagged before a handoff.

OBJECTIVE 03

Reviewers could correct a field without losing its source context.

Design considerations

- Keep suggestions separate from approved actions.
- Retain source context for reviewer inspection.
- Evaluate uncertain outputs and escalation paths before operational use.

About this brief

Prepared from the current portfolio summary. Client identities, original screenshots, delivery dates, and measured results were not supplied. The artwork is AI-generated; business benefits describe objectives, not verified outcomes.
