What the project focuses on.

Keep learning activities, assessment feedback, and cohort context together.

FEATURE 01

Structured lesson modules

Organize learning material into focused modules.

FEATURE 02

Cohort enrolment

Keep learners connected to their cohort context.

FEATURE 03

Assessment and feedback

Give assessment work a feedback and review path.

FEATURE 04

Learner progress views

Make the next learning activity easier to identify.

Workflow at a glance

STEP 01

Join a cohort

STEP 02

Open lesson modules

STEP 03

Submit an assessment

STEP 04

Review instructor feedback

This overview communicates the project's intended business flow; it is not a technical specification or original system diagram.

The business objectives.

The project's focus translated into practical goals for the people using it.

OBJECTIVE 01

Learners could find their next lesson without searching file links.

OBJECTIVE 02

Instructors could connect feedback to a particular submission.

OBJECTIVE 03

Training administrators could separate each customer's cohort.

Design considerations

- Make the primary customer task clear on mobile and desktop.
- Keep permissions, validation, and administrative review explicit.
- Provide clear status, feedback, and recovery for incomplete actions.

About this brief

Prepared from the current portfolio summary. Client identities, original screenshots, delivery dates, and measured results were not supplied. The artwork is AI-generated; business benefits describe objectives, not verified outcomes.
