What the project focuses on.

Give employees a clear route to internal services while keeping manager decisions visible.

FEATURE 01

Onboarding checklists

Make new-hire handoffs visible across departments.

FEATURE 02

Leave requests and approvals

Give leave requests a clear approval path.

FEATURE 03

Versioned policy library

Keep policy access tied to the current version.

FEATURE 04

Internal service requests

Route employee requests to an accountable owner.

Workflow at a glance

STEP 01

Start onboarding

STEP 02

Submit a request

STEP 03

Review permission and policy

STEP 04

Record the decision

This overview communicates the project's intended business flow; it is not a technical specification or original system diagram.

The business objectives.

The project's focus translated into practical goals for the people using it.

OBJECTIVE 01

New hires could see their remaining onboarding tasks.

OBJECTIVE 02

Managers could review requests with the relevant context.

OBJECTIVE 03

Employees could find approved policies without asking multiple teams.

Design considerations

- Define role permissions and account boundaries.
- Keep workflow decisions attached to their business records.
- Handle integration errors and exceptional handoffs clearly.

About this brief

Prepared from the current portfolio summary. Client identities, original screenshots, delivery dates, and measured results were not supplied. The artwork is AI-generated; business benefits describe objectives, not verified outcomes.
