What the project focuses on.

Connect a property enquiry to a reviewed listing and an accountable agent follow-up.

FEATURE 01

Listing filters and comparison

Compare listings around a buyer's requirements.

FEATURE 02

Availability and editorial review

Keep availability and listing information reviewable.

FEATURE 03

Viewing requests

Turn interest into an organized viewing request.

FEATURE 04

Agent enquiry assignment

Give each enquiry an accountable agent owner.

Workflow at a glance

STEP 01

Search listings

STEP 02

Compare availability

STEP 03

Request a viewing

STEP 04

Assign an agent

This overview communicates the project's intended business flow; it is not a technical specification or original system diagram.

The business objectives.

The project's focus translated into practical goals for the people using it.

OBJECTIVE 01

Visitors could compare properties before contacting an agent.

OBJECTIVE 02

Editors could manage the current availability of each listing.

OBJECTIVE 03

Agents could follow up with the requested property's details attached.

Design considerations

- Make the primary customer task clear on mobile and desktop.
- Keep permissions, validation, and administrative review explicit.
- Provide clear status, feedback, and recovery for incomplete actions.

About this brief

Prepared from the current portfolio summary. Client identities, original screenshots, delivery dates, and measured results were not supplied. The artwork is AI-generated; business benefits describe objectives, not verified outcomes.
